

## HO SCALE SHINGLES ASSEMBLY INSTRUCTIONS

Thank you for purchasing Maple Leaf Trains Shingles.

We Offer Shingles in many styles. Assembly is very easy and straight forward.

Some points to consider when planning when planning the desired roof shape:

1. For best results and most prototypical appearance spacing between shingle rows should be .08" to .1" (2mm-2.5mm).
2. Prior to assembly (removing double sided tape protective film) Make sure surface is clean and dry.
3. Strat assemble shingles from the bottom towards the top of the roof

When using ridge caps please

Ridge cap set:

Please inspect content of laser cut sheet. It contains 3 items:

### "Regular" Roof Shingles

Regular shingles goes throughout the roof.

### "Thin Base" Shingles

The Thin base Shingles designed for the last row (top row) of shingles before the ridge caps they provide more flexibility however, they are a bit more delicate and should be handled carefully

### Ridge Caps

We engraved a small notch in the middle of each ridge caps for easy folding and assembling.

Please feel free to contact us with and questions you might have!
